Philips Sonicare's deep clean

- Up to 4x more surface contact** for an effortless deep clean

Innovative technology

- Handle automatically selects optimal mode and intensity***
- Philips Sonicare's advanced sonic technology

Designed to optimize performance

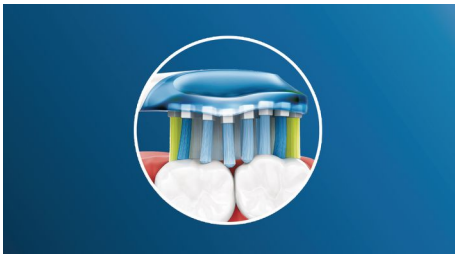
- For the most effective cleaning, every day
- Works with any Philips Sonicare click-on toothbrush
- Rigorously tested to meet patients' oral health needs

Highlights

Sonicare's best plaque removal

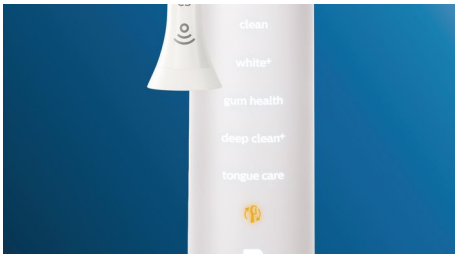
The Philips Sonicare Premium plaque control brush head provides patients our deepest clean yet. With its flexible sides and unique bristle pattern design, Premium Plaque Control is proven to remove up to 10x more plaque, even in hard-to-reach spots** for a truly deep clean along the gumline and between teeth.

Adaptive cleaning technology



Patients get a personalized clean every time they brush with our adaptive cleaning technology. Soft, flexible rubber sides let C3 Premium Plaque Control adapt to the unique contours of the mouth. Our bristles adjust to gums and teeth, giving patients up to 4x more surface contact than a DiamondClean brush head for deeper cleaning, even in hard-to-reach spots. Adaptive cleaning technology also: allows gentle tracking along the gumline; absorbs excessive brushing pressure; and enables an enhanced sweeping motion, for a unique in-mouth feel and superior cleaning.

BrushSync mode pairing

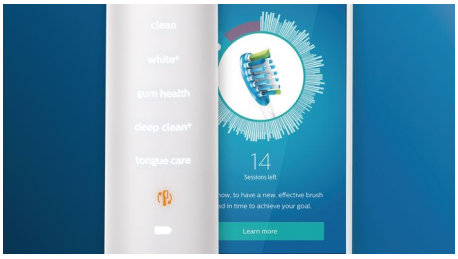


Patients will always get their best possible clean with our BrushSync mode pairing feature. A microchip in the C3 Premium Plaque Control brush head syncs with the connected Philips Sonicare toothbrush handle. It prompts the handle to automatically select the optimal brushing mode and intensity level for exceptional plaque removal. All your patients need to do is start brushing.

Philips Sonicare technology

Philips Sonicare's advanced sonic technology pulses water between teeth, and its brush strokes break up plaque and sweep it away for an exceptional daily clean.

Smart brush head replacement



Brush heads exhibit fatigue and bristle wear after three months of normal use. Philips Sonicare smart toothbrushes provide accurate brush head replacement reminders based on how often patients brush and how much pressure they use. For those who don't use a smart toothbrush, C3 Premium Plaque Control's blue reminder bristles fade to white to let patients know it's time for a replacement brush head.

Easy to click-on

C3 Premium Plaque Control simply clicks on to a Philips Sonicare toothbrush handle for a secure fit and easy maintenance and cleaning. C3 Premium Plaque Control fits all Philips Sonicare toothbrush handles except PowerUp Battery and Essence.

Safe on teeth and gums

All genuine Philips Sonicare brush heads are proven safe and gentle on teeth and gums. Our products are strictly tested to ensure patients get exceptional performance and durability each time they brush.
