SCD570/10

The most reliable connection to your baby

Advanced monitoring for you and your baby

Our new DECT SCD570/10 Baby Monitor delivers advanced monitoring. Providing the most reliable connection with crystal clear sound, temperature sensor, a soothing night light and lullabies for you and your baby.

Freedom and flexibility

- Range up to 330 meters*
- A docking station to recharge your parent unit
- Superior operating time up to 18 hours
- Vibration alert
- Instant dim mode for a peaceful night

Comforting and soothing your baby

- Stay connected with talk back
- Comforting night light and lullabies to calm your little one

Reliable, secure connection & constant reassurance

- Always know when your monitor is in range and connected
- Perfect clear sound due to DECT Technology
- Energy saving Smart ECO mode
- Sound level lights indicate if the baby makes noise
- Monitor the temperature in your baby's room

Highlights

Zero interference with DECT

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby.

Perfect clear sound

Hear every tiny giggle, gurgle, and hic-up with perfect clarity.DECT(Digital Enhanced Cordless Telecommunications) technology provides high quality, crystal clear sound so you can hear your baby anytime.

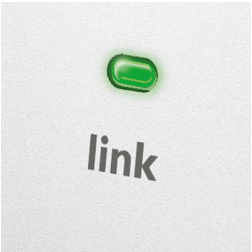
Smart ECO mode

The unique Smart ECO mode automatically minimizes your transmission power and increases your battery lifetime. The closer you are to your baby, the less power is needed for a perfect connection (not available in US and Canada).

Sound activation 5 LED lights

Lights are activated to indicate the level of sound in your baby's room. Even when the Parent Unit is muted.

Always connected



The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

Temperature sensor

The temperature sensor with customized alert allows you to monitor the climate in your baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A customized temperature sensor will immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes.

330m Range

Indoor range up to 50 meters*. Outdoor range up to 330 meters*.

Docking station

A docking station enables you to conveniently recharge your parent unit.

Operating time up to 18 hours

The small, rechargeable parent unit will give you the freedom of cordless streaming for up to 18 hours before re-charging is required.

Vibration alert

Personalize your alert settings and get notified by a silent and subtle vibration of the parent unit.

Peaceful night mode

Press the night dim button to instantly activate the peaceful night mode. In this mode the light intensity of the lights, display as well as the volume of the alerts are reduced. Easily press the night dim button again in order to switch back to normal operating mode.
