- Body attachment with curved-in design

Maximum freedom, minimum hassle

- With SmartSkin sensor
- FREE Lumea App for a personal coach at your fingertips
- No replacement parts, no hidden costs

Highlights

Lumea prevents hair regrowth*

IPL stands for Intense Pulsed Light. Philips Lumea applies gentle pulses of light to the hair root, putting the follicle into a resting phase. As a consequence, the amount of hair your body grows gradually decreases. Repeating the treatment leaves your skin beautifully hair free and touchably smooth. Treatment to prevent hair regrowth is safe and gentle, even on sensitive areas. Philips Lumea is clinically tested and developed with dermatologists for easy and effective treatment, from the comfort of your own home.

Proven effectiveness

Objective studies show up to 92% hair reduction in as little as 3 treatments**. The first 4 treatments must be carried out every 2 weeks, after which you should already be able to see the desired results. To maintain your results, simply touch up every 4 weeks. After just 8 touch up treatments you can be hair-free for 6 months* To enlarge this picture, please click on the image in the image gallery at the top of this page.

Suitable hair and skin types

Philips Lumea Prestige works effectively, easily and safely on a wide variety of hair and skin types. It works on naturally dark blonde,

brown and black colored hairs and on skin tones from very white to dark brown. As with other IPL based treatments, Philips Lumea cannot be used to treat white / grey, light blonde or red hair and is not suitable for very dark skin. This is due to the high contrast required between the pigment in hair color and pigment in the skin tone.

Treatment of body areas

Your body is unique. And its skin, curves and contours should be treated uniquely too. Lumea's total-body attachments are shaped to perfectly fit every curve, and will adapt programs tailored to each body area. Treatment windows are designed to maximize contact with your skin to ensure light doesn't escape, enabling effective and gentle treatments even on delicate or sensitive areas.

Face attachment

The face attachment has been thoughtfully designed to have a small, flat 2 cm² window so you can effectively and gently treat hair on your face. Ideal for your upper lip, chin or jawline, the attachment also has an extra filter integrated within. When added to the device, the intelligent attachment automatically adapts the light treatment for your face. 84% of women satisfied with hair reduction on face****.

Precision attachment

The intelligent precision attachment is medium-sized with a 3 cm² window for precise coverage of bikini and underarm areas. The curved design closely follows your body's contours for maximum skin contact. When the attachment is clicked on to the device it adapts a tailored program for these body areas.

Body attachment

The intelligent body attachment has our largest treatment window at 4.1 cm² so it's perfect for a fast treatment on larger body areas like legs, arms and stomach. The curved-in design closely follows your body's contours for maximum skin contact. Click on the attachment it adapts a tailored program specifically for your body area. 83% of women satisfied with hair reduction on legs****.

SmartSkin sensor

Philips Lumea Prestige has 5 energy settings and makes it easy for you to choose one thanks to the SmartSkin sensor. The SmartSkin sensor indicates the most comfortable setting for women with a similar skin tone to yours.
