# Highlights

## SleepMapper mobile app

The SleepMapper mobile app tracks your sleep patterns over time, measures key metrics and shows the slow wave boost you get from SmartSleep each night. Sync the app to your headband each morning to see the enhancement given each night. Please consult the Google Play Store or Apple App Store to check the compatibility of your operating system before purchase.

## View trends over time

App provides data, trends and insights into your sleeping patterns.

## Sleep Tips

Changes to your sleep regimen can result in better daytime outcomes in energy, cognition and memory.

## App Privacy

SleepMapper App is highly secure to help meet requirements for privacy laws.

## App Development

Developed with researchers, engineers and consumers.
