Care Orchestrator

Extended search

Helping to optimize
your patient workflows

Extended search – temporary access

To sign in to your Care Orchestrator (CO) account, navigate to www.careorchestrator.com. After entering your **username** and **password**, click the “**login**” button (located on the center of the page).

The patient’s answers serve as an identifier

Description

- Allows **temporary** access to patient record for external users when an exact match exists on first name and last name and date of birth and accurate real-time response to a randomized demographic challenge is entered

To gain access to the patient record, the referral has to certify that:

- He/she is a **licensed healthcare provider involved in the treatment of this patient**
- The patient or the authorized representative of the **patient has consented to access of this record**, which may contain patient demographics and treatment information

Helpful hints

- Don't have the patient's device serial number handy? It can be found on a previous compliance report or underneath the device.
- The address is specific to “**street**” “**way**” “**South**” “**S.,**” etc. Must be typed exactly as is.

1 Search for patient and then click the “**Don't see your patient? Extend Search**” dropdown.

2 Make sure **first name** and **last name** are entered. Then enter patient's **date of birth** and check the box below the **date of birth**.

3 Choose any one of the provided “**Confirm patient match**” options from the “**Options**” dropdown and then enter the correct information for that selection in the “**Patient Information**” field.

4 Click “**Submit**” button.
