dStream Wrist 8ch

MR coils

Designed for **high resolution wrist imaging**

Key benefits

- Designed for high resolution visualization of interosseous ligaments
 - One-piece hinged design for easy patient setup
 - Comfortable positioning at the patient's side
-

A coil that closely fits the left or right wrist for high signal-to-noise ratio (SNR). This design provides the high SNR needed to acquire images with a small field of view (FOV). It has a one piece, ovoid, hinged design for easy patient set up. High quality imaging can be obtained with the coil at the patient's side. The coil attaches to a rigid base plate for fixation to reduce patient motion.
