SCF274/51

Fast and easy to use

Avent Sterilizer with one touch operation

This Avent electric sterilizer is simple and straightforward to use right from the start. At the touch of a button it will sterilize your bottles and accessories in only 8 minutes. Includes 1 Avent Feeding Bottle and handy accessories.

Fast

- Contents are sterile and ready to use in only 8 minutes

Easy to use

- Just add water, load and switch on

Large capacity

- Holds up to six Philips Avent Bottles

Safe, easy handling

- Sterile contents for longer

Effective sterilisation

- Extra protection through natural steam sterilisation

Highlights

Natural steam sterilisation

Sterilising is all about protecting your baby from particularly harmful milk bacteria until his immune system is strong enough. The Philips Avent Steriliser uses the hospital method of steam sterilisation, which is quick, easy, and efficient, with no chemicals involved.

Holds up to six bottles

The steriliser has a smart design that takes up little space in your kitchen, yet still fits six Philips Avent Bottles or two Philips Avent Breast Pumps. The two baskets inside can clip together to form a dishwasher basket, which makes pre-cleaning of smaller items like soothers and teats much easier.

Just add water

The Electric Steriliser is very easy to use and will make your daily sterilising chore effortless. Just add water, load the steriliser with the contents you would like to sterilise and switch it on.

Sterile contents in 8 minutes

The advantage of steam sterilisation is that it is much quicker (and safer) than the traditional method of boiling bottles in a pan on the stove. The Electric Steriliser takes as little as 8 minutes to sterilise a full load of 6 bottles, teats, and dome caps.

Sterile contents for longer

Once the sterilisation cycle has been completed the contents inside the Philips Avent Electric Steriliser will remain sterile for up to 6 hours if the lid is unopened.
