Highlights

Clips close the lid securely

The microwave sterilizer has clips on the side for extra safety. The clips close the lid securely so hot water cannot easily escape when you take the sterilizer out of the microwave. The side grips have also been designed to stay cooler to help you handle the sterilizer safely.

Just add water

Just add water, load and place in the microwave for as little as 2 minutes. The exact length of the cycle will depend on the wattage of your microwave: 2 min at 1100-1850 Watt, 4 min at 850-1000 Watt, 6 min at 500-850 Watt.

Convenient for travel

The Philips Avent Microwave Sterilizer has been designed to fit most microwaves in the market. Its small size makes it convenient for

travel, ensuring that you always have a sterile bottle when you are going on a short overnight trip or on a longer holiday abroad. Also ideal as an extra sterilizer for the grandparents' house. Dimensions: 166 (H), 280 (W), 280 (L) mm.

Natural steam sterilization

Sterilizing is all about protecting your baby from particularly harmful milk bacteria until his immune system is strong enough. The Philips Avent Sterilizer uses the hospital method of steam sterilization, which is quick, easy, and efficient, with no chemicals involved.

Contents remain sterile

Contents remain sterile for up to 24 hours if unopened

Holds 6 Philips Avent bottles

Despite its small size, it is the only microwave sterilizer that is designed to fit 6 Philips Avent bottles. Whereas most microwave sterilizers will only fit 4 bottles, the Philips Avent Microwave Sterilizer allows you to sterilize a full day's worth of bottles in one go. It is also suitable for sterilizing breast pumps.
