Odourless and taste-free

- User-friendly silicone teats

IDHF approved

- This product is approved by IDHF

Highlights

Unique "wings"

Advanced orthodontic teat with unique wings that minimise the pressure on gums and developing teeth. The wings make the teat wider so that the pressure that is caused by baby's suckling is distributed more evenly, resulting in less pressure per tooth.

Shaped teat

The teat is shaped to let baby's tongue remain in a natural position.

Snap on hygienic cap

To keep sterilised teats hygienic.

User-friendly silicone teats

The Philips AVENT silicone teat is taste- and odour-free so it's more likely to be accepted by your baby. The silicone is smooth, transparent and easy to clean, and it doesn't get sticky. The teat is strong and long-lasting, and won't become misshapen or discoloured over time.
