DECT Baby Monitor  
with ECO Modes

SCD526/00

## Always connected to your baby

### Zero Interference & private connection guaranteed

Our DECT baby monitors give you the reassurance of always feeling close to your baby, even when you are not with them. Now with intelligent ECO, you can adjust your DECT signal, whilst still maintaining a link to your baby when you need it.

#### **Zero interference & private connection**

- DECT technology guarantees zero interference & 100% privacy
- Adjust your DECT signal with two simple ECO Modes

#### **Crystal clear sound**

- Reassurance of crystal clear sound
- LEDs light to signal noise levels
- Choose the best sound level for your surroundings

#### **Total comfort**

- Monitor the temperature in baby's room
- Stay connected with talk back
- Remote activated night light and lullabies

#### **330m range**

- Extra long range for total mobility
- Up to 24 hour operation time before recharge
- Always know that you are connected

# Highlights

## Zero interference

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby

## Reassuring crystal clear sound

Hear every tiny giggle, gurgle and hic-up with perfect clarity. DECT technology provides high quality, crystal clear sound so you can hear your baby anytime

## Digital temperature display

Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A special electronic temperature sensor will immediately alert you, through the digital display on the parent unit, if your baby's room becomes too hot or too cold

## Two intelligent ECO Modes

Two intelligent ECO modes help you to reduce or fully turn off your DECT signal, whilst maintaining contact with your baby when you

need it ECO Mode: Energy saving ECO Mode with a reduced strength DECT signal - perfect for when you are close by your baby Max ECO Mode with auto wake up. This mode completely turns off the DECT signal, so your monitor uses no transmission power - like a stand-by mode, when your baby is sound asleep. Once your baby makes a noise, the unit 'wakes up' and starts sending a signal, fully restoring your connection.

## Extended operating range

With a range of 330m, belt clip and neck cord so you can be fully mobile in and around the home

## Superior operating time

The small, rechargeable parent unit will give you the freedom of cordless roaming for up to 24 hours before re-charging is required

## LEDs light to signal noise

Lights are activated to indicate the level of sound in your baby's room. Even with the parent unit is muted, a sound alert will notify you when a set sound level is reached

## Adjustable sound sensitivity

Enables you to adjust the sound and volume levels, so you can hear every giggle, gurgle and hic-up

## Out of range/low power signals

The parent unit of the Philips AVENT baby monitor will alert when the power is low, or if you are out of range

## Two way communication

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home

# Specifications

## Power

Operating time on battery: 24 hour(s)  
Power supply: 220 - 240 V  
Charging time: 8 hrs

## Tuner/Reception/Transmission
