

PHILIPS

AVENT

Digital Video Baby Monitor

Private & secure (A-FHSS)

2.7 inch color screen

Soothing lullabies & talkback

SCD833/01

Always close to your baby

Private and secure with A-FHSS technology

The Philips Avent SCD833 enables you to maintain a secure and private connection with your baby at all times. Hear your baby with perfect sound quality and also see your baby in crystal clear vision (2.7" LCD), whether it is day or night.

Private and secure connection

- Private, secure connection with adaptive FHSS technology
- High resolution 2.7" screen with crystal clear night vision
- Hear your baby with clear sound
- Energy saving eco mode with connection indication

Reliability and reassurance

- Know you are connected with LED alerts

Freedom, flexibility, comforting & soothing

- Range up to 300 meters*
- Excellent operating time for overnight monitoring
- Talk to your baby remotely
- Comforting lullabies to calm your little one
- Choose the best sound level for your surroundings

Highlights

Private, secure & adaptive FHSS

Unique handset pairing for a private, secure connection to your baby. Combined with the new Adaptive FHSS (Frequency Hopping Spread Spectrum) technology for minimal interference.

2.7" color screen

See your baby, day and night, with crystal clear infra-red night vision that automatically switches on in the dark. Enjoy your baby sleeping with the high resolution extra large 2.7" color screen.

Perfect clear sound video

Hear every tiny giggle, gurgle, and hic-up with perfect clarity. Not only see but also hear your baby anytime with high quality, crystal clear sound.

ECO mode

Switch on the ECO mode to reduce power consumption during quiet times in the baby room while still knowing you are connected to

your baby via the unique link indication. The ECO mode switches off the audio/video transmissions and the units only connect when the baby makes a sound.

Always connected

Always know when your monitor is in range and connected. The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

300m Range

Indoor range up to 50 meters*, Outdoor range up to 300 meters*.

Operating time up to 10 hours

The convenient rechargeable parent unit will give you the freedom of cordless monitoring for up to 10 hours before re-charging is required.

Talk back

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home.

Lullabies

There's nothing like a gentle lullaby to calm a restless baby. From any room in the house you can select one of 5 relaxing tunes and switch, helping your baby to drift effortlessly to sleep in no time.

Sensitivity control

It allows you to set the microphone sensitivity of the baby unit. The microphone sensitivity determines what noise level the baby unit picks up, e.g. you will want to hear when your baby cries, but you may be less interested in its babbling.
