

# PHILIPS

## AVENT

Feeding bottle

11ozx2

Variable Flow Nipple

SCF686/27

## Less fussing, especially at night\*

### Less colic\*\*

Unsettled and irritable behavior, known as fussing, is by far the most commonly known crying behavior in babies. Clinical studies show that the AVENT Bottle significantly reduces colic and fussing. Fussing is reduced especially at night\*

#### **Less fussing**

- Clinically proven to significantly reduce fussing\*

#### **To fit your baby's growing needs**

- Five different nipple flow rates are available

#### **0% BPA (Bisphenol A Free)**

- This bottle is made from PP - a BPA Free material

#### **Two piece anti-colic system**

- Allows air into the bottle instead of your baby's tummy

# Highlights

## Significantly reduces fussing

Sleep and nutrition are vital to your baby's health and happiness. A randomised clinical trial was carried out to see whether infant feeding bottle design affects "infant behaviour". The Philips AVENT bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs 74 min, p=0.05). This was especially true during night-time.

## Fits your baby's growing needs

Five different nipple flow rates are available.

## 0% BPA (Bisphenol A Free)

This bottle is made from PP - a BPA Free material

## Unique anti-colic valve

The two piece anti-colic system consists of the AVENT Nipple and adapter ring. As your baby feeds, the unique skirt on the AVENT Nipple flexes to allow air into the bottle instead of your baby's tummy. Like natural breastfeeding your baby controls the milk flow.

# Specifications

## Country of origin

England

## Material

BPA-Free

## What is included

Feeding Bottle: 2 pcs

## Bottle

Material: BPA free

## Design

Bottle design: Easy to assemble, Easy to hold, Wide neck

## Functions

Anti colic valve: Two piece valve

## Development stages

Stages: 0 - 6 months

\* A clinical study showed that at two weeks of age, babies showed less fussing than babies fed with another bottle. (Study conducted by the Institute of Child Health, London, 2008.)

\*\* A clinical study showed that at 2 weeks of age, infants fed with an AVENT bottle showed less fussing than infants fed with another leading bottle, especially at night.

\*\*\*When using the Philips AVENT electric bottle warmer, do not place basket inside the warmer when using the Philips AVENT 11oz/330ml feeding bottle.
