Highlights

Zero interference with DECT

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby.

Perfect clear sound

Hear every tiny giggle, gurgle, and hic-up with perfect clarity. DECT (Digital Enhanced Cordless Telecommunications) technology provides high quality, crystal clear sound so you can hear your baby anytime.

Smart ECO mode

The unique Smart ECO mode automatically minimizes your transmission power and increases your battery lifetime. The closer you are to your baby, the less power is needed for a perfect connection (not available in US and Canada).

Sound activation 5 LED lights

Lights are activated to indicate the level of sound in your baby's room. Even when the Parent Unit is muted.

Always connected

The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

Temperature sensor

The temperature sensor with customized alert allows you to monitor the climate in your baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A customized temperature sensor will immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes.

330m Range

Indoor range up to 50 meters*. Outdoor range up to 330 meters*.

Docking station

A docking station enables you to conveniently recharge your parent unit.

Operating time up to 18 hours

The small, rechargeable parent unit will give you the freedom of cordless streaming for up to 18 hours before re-charging is required.

Vibration alert

Personalize your alert settings and get notified by a silent and subtle vibration of the parent unit.

Peaceful night mode

Press the night dim button to instantly activate the peaceful night mode. In this mode the light intensity of the lights, display as well as the volume of the alerts are reduced. Easily press the night dim button again in order to switch back to normal operating mode.

Night light and lullabies

There's nothing like a gentle lullaby and a warm tranquil glow of a night light to calm a restless baby. From any room in the house you can select one of 5 relaxing tunes and switch on the night light, helping your baby to drift effortlessly to sleep in no time. (Remote activation not available in US and Canada).
