- Docking station for convenient charging

Soothing and sleep

- Sooth your baby with the starry night light projector
- Comforting night light and lullabies to calm your little one
- Talk to your baby remotely

Highlights

100% private, no interference

DECT technology provides a secure and private connection, so you can be sure you are the only one listening in. It guarantees zero interference from any other transmitting devices- like other baby monitors, cordless phones and cell phones.

Crystal clear sound

DECT technology provides crystal clear sound, so you can hear every tiny giggle, gurgle, and hic-up with perfect clarity.

Smart ECO Mode

The unique Smart ECO mode automatically minimizes the audio transmission and increases your battery time. The closer you are to your baby, the less power is needed for a perfect connection.

Range up to 330 meters*

*Indoor range up to 50m, outdoor range up to 330m.

Excellent operating time

The convenient rechargeable parent unit will give you the freedom of cordless monitoring for up to 18 hours per charge.

Know you are connected

5 sound level lights indicate the level of sound in your baby's room even when the parent unit is muted. With the link indication you always know when your monitor is in range and connected. The parent unit will alert you when your monitor is out of range or when the power is low, helping you to make sure that you are always connected to your baby.

Starry night light projector

Help soothe and calm your baby to sleep with the starry night light projection. Conveniently activated from the parent or baby unit.

Night time friendly mode

Personalize your alert settings and get notified by the silent and subtle vibration mode. Easily switch to night mode at the press of a button to dim the lights, display and sound.

Night light and 5 lullabies

There is nothing like a gentle lullaby and a warm tranquil glow of a night light to calm a restless baby. Play one of the 5 relaxing tunes and switch on the night light from any room in the house. Help your baby to drift effortlessly back to sleep in no time.

Convenient charging stand

Conveniently recharge your parent unit on the docking station. Place it in your bedroom for easy charging at night, or use it as a stand during the day.

Talk to your baby remotely

Sometimes all your baby needs is the soothing sound of your voice. With one click, this essential feature allows you to talk to your baby from anywhere in the house.
