PHILIPS AVENT

Highlights

Zero interference with DECT

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby.

Perfect clear sound

Hear every tiny giggle, gurgle, and hic-up with perfect clarity. DECT (Digital Enhanced Cordless Telecommunications) technology provides high quality, crystal clear sound so you can hear your baby anytime.

ECO mode

Switch on the ECO mode to reduce transmission power in the baby room. In the ECO mode the units only connect when the baby makes a sound.

Sound activation 5 LED lights

Lights are activated to indicate the level of sound in your baby's room. Even when the Parent Unit is muted.

Always connected

The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

330m Range

Indoor range up to 50 meters*. Outdoor range up to 330 meters*.

Rechargeable parent unit

The rechargeable parent unit enables you to move in and around the home.

Operating time up to 24 hours

The small, rechargeable parent unit will give you the freedom of cordless roaming for up to 24 hours before re-charging is required. However this is depending on the type of batteries used and how often and how long you use the parent unit on batteries.

Calming & soothing

Help soothe your baby to sleep with the warm tranquil glow of the night light and soft lullabies.

Talk back function

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home.
