Highlights

Overheat protection

To avoid the danger of accidentally burning your baby's mouth, the automatic switch off ensures the food does not get too hot.

PTC heating element

To avoid the danger of accidentally burning your baby's mouth, the automatic switch off ensures the food does not get too hot.

Double insulation

With your safety and convenience in mind, the double insulated bottle warmer is designed to be used in every room in the house, not just where a earthed mains socket is available. There are no exposed metal parts that can become live.
