Highlights

Relaxing position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle, even when you are sitting up straight. This means you can sit more comfortably when pumping: no need for you to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping, helps your milk to flow more easily.

Soft massage cushion

Our massage cushion has a soft velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk flow. The iconic petal cushion is designed to mimic baby suckling, intended to gently help stimulate let down.

Easy on-the-go

The breast pump is small and lightweight, which means it is easy to store and transport, making pumping on-the-go more discreet.

Easy set up, express and clean

Few separate parts and intuitive design. Easily express milk for your baby, anytime.

Includes our Natural bottle

The wide breast shaped nipple promotes natural latch on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Specifications

Material

Breast pump: BPA free* (food contact parts only)

Bottle: BPA free*, Polypropylene

Nipple: BPA free*, Silicone

Philips Green Logo

Philips Green Products can reduce costs, energy consumption and CO2 emissions. How? They offer a significant environmental improvement in one or more of the Philips Green Focal Areas – Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability.

* Clinically proven comfort: Tests carried out on 110 mothers showed a significant preference for Philips Avent vs a leading competitor

* More Comfort: 73% out of 73 UK breastfeeding mothers agreed that this breast pump was more comfortable than their current pump (main market brands).

* Independent research has shown that there may be a link between stress levels and milk production. See www.philips.com/avent

* BPA Free breast pump: Only associated with the bottle, and other parts that come into contact with breast milk. Following EU regulation, 10/2011
