### Total comfort

- Monitor the temperature in baby's room
- Remote activated night light and lullabies
- Stay connected with talk back

# Highlights

## Guaranteed zero interference

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby

## Extended operating range

With a range of 330m, belt clip and neck cord so you can be fully mobile in and around the home

## Superior operating time

The small, rechargeable parent unit will give you the freedom of cordless roaming for up to 24 hours before re-charging is required

## LEDs light to signal noise

Lights are activated to indicate the level of sound in your baby's room. Even with the parent unit is muted, a sound alert will notify you when a set sound level is reached

## Lullabies and night light

Your baby may still be restless when you first put them to bed. Help soothe and calm your baby to sleep with the warm tranquil glow of the night light. Activate from the parent or baby

unit. (Remote activation not available in US)  
There's nothing like a gentle lullaby to calm a restless baby. From any room in the house you can elect one of 5 relaxing tunes, helping your baby to drift effortlessly to sleep in no time. (Remote activation not available in US and Canada)

## Two way communication

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home

## Digital temperature display

Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A special electronic temperature sensor will immediately alert you, through the digital display on the parent unit, if your baby's room becomes too hot or too cold
