

**GB** For your child's safety and health **WARNING!** • Before first use, clean the product. After every use, take all items apart, wash and rinse thoroughly. Sterilise using a Philips AVENT Steriliser or boil for 5 minutes. This is to ensure hygiene • Always use this product with adult supervision • Never use feeding teats as a soother • Continuous and prolonged sucking of fluids will cause tooth decay • Always check food temperature before feeding • Keep all components not in use out of the reach of children • Do not leave a feeding teat in direct sunlight or heat when not in use, or leave in disinfectant ("sterilising solution") for longer than recommended, as this may weaken the teat • Before each use, inspect the product. Throw away at the first sign of damage or weakness • During inspection of teats pull the feeding teat in all directions • DO NOT warm contents in a microwave oven as this may cause uneven heating and could scald your baby • Wash your hands thoroughly and ensure surfaces are clean before contact with sterilised components • DO NOT use abrasive cleaning agents or anti-bacterial cleaners • Excessive concentrations of detergents may eventually cause plastic components to crack. Should this occur, replace immediately • Dishwasher safe – food colourings may discolor components • For hygiene reasons, we recommend replacing teats/spouts after 3 months • Always assemble teats when wet • DO NOT overtighten teat assembly on bottle • Keep teats in a dry, covered container • DO NOT allow child to play with small parts or walk/run while using bottles or cups • Drinks other than milk or water, such as fruit juices and flavoured sugary drinks are not recommended. If they are used, they should be well diluted and only used for limited periods, not constantly sipped • MAGIC and SPORTSTER CUPS and SPOUTS are not suitable for hot, fizzy or pulpy drinks • DO NOT use cups with spouts to mix infant formula as this may clog the non-spill valve and cause components to leak • Always ensure the valve is properly assembled • Magic Cups should only be used as an aid to help children progress to using ordinary cups.

Spare teats and spouts with valves are available separately. Use only AVENT Teats with AVENT Feeding Bottles.
