- Angled brush head neck for better reach to back teeth
- UV brush head Sanitiser — Cleaner brush, better oral health

Offers you a customised cleaning experience

- Easy-start programme to acclimate to the Sonicare experience
- Three different modes for a better cleaning experience

PHILIPS
sonicare

sense and simplicity

Highlights

Patented sonic technology

Sonicare's unique dynamic action gently and effectively reaches deep between teeth and along the gumline.

Angled brush head neck

Uniquely angled brush head neck makes it easier to reach back teeth, removing plaque in those hard-to-reach areas.

UV brush head Sanitiser

All-in-one sanitising, charging and storage. The UV brush head Sanitiser helps keep your brush head free of bacteria. It kills up to 99% of bacteria and viruses.*

Naturally whiter teeth

Dynamic Cleaning Action and direct broader contact with each tooth have been proven to remove everyday stains and help keep teeth naturally whiter.

Safe and gentle

Your Sonicare is safe to use on: braces (brush heads wear out sooner when used on braces), dental restorations (fillings, crowns, veneers) and periodontal pockets.

Improves gum health

Optimal cleaning between teeth and along the gumline provides improved gum health in just two weeks. Giving a superior clean in between teeth and removes significantly more plaque than a manual toothbrush

Smartimer

Two-minute timer helps ensure Dental Professional recommended brushing time

Quadpacer

30 seconds interval timer indicates when you have completed each quadrant of your mouth and signals for you to move on, resulting in more consistent cleaning throughout your mouth

Easy-start programme

Gently increases power over the first 14 uses to ease into the Sonicare experience

Three different cleaning modes

The three modes include a clean mode for an outstanding clean in 2 minutes. A sensitive mode for gentle yet thorough cleaning of the gums and a massage mode to stimulate the gum.
