- Sound level (average): 46 dB
- Sound level (max): 49 dB

## Weight

- Charging case: 462 g
- Female massager: 62 g
- Male massager: 73 g

# Highlights

## Her pleasing him

The male massager is specially shaped to stimulate and please him. The curves of the male massager are shaped for his most intimate contours, enhancing erotic pleasure. Slowly brush the wider surface of the massagers, for instance, up the inside of the thigh or gently along the penis. The rounded tips are perfect for teasing in more focused ways and locations, such as around the nipple or between the genital and rectal area.

## Him pleasing her

The female massager is specially shaped to stimulate and please her. The tip is the area of the massager that vibrates, allowing you to stimulate her erogenous zones. Try a relaxing pulse on the labia or hold the tip of the massager downwards to titillate the clitoris. Of course, the massager can be used as well on many other body areas.

## Charging case

The Dual Sensual Massagers can be charged in the beautiful and discreet charging case. You can just leave it on your nightstand! No one will ever know what you use it for...

## Soft, sensual material

Made of a soft, sensual material, the intimate massagers feel comfortable and sexy against your skin. Incorporate these massagers into foreplay, using their natural fit in the hand to experiment together for excitement and stimulation, maintaining touch between partners.
