- Number of modes: 4
- Sound level (average): 32 dB
- Sound level (max): 43 dB

## Weight

- Charging case: 114 g
- Intimate massager: 74 g

# Highlights

## Sensual shape for both

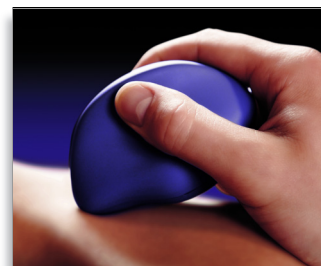

The massager feels comfortable to hold in many ways; in your palm, between your fingers, or with your fingertips. The massager is specially shaped to fit as naturally in your hand as it does to specific curves and parts of the body, while letting you maintain skin contact with your partner. You can turn the concave part away from the palm, for instance, to stroke the penis, or wrap your hand around the concave surface to titillate the clitoris with the rounded tips.

## Pre-warming function

You can choose to gently pre-warm the sensual massager to a comfortable body temperature. To use it, place the massager on the charger and press the pre-warming button. It takes five minutes for the massager to warm up. The warming along with the pleasure your touch gives, lets your partner also feel an arousing warmth from the massager's surface.

## Soft, sensual material

Made of a soft, sensual material, the sensual massager feels comfortable and sexy against your skin. Incorporate the massager into foreplay or use during sex. Using its natural fit in the hand to experiment together for excitement and stimulation, maintaining touch between partners.
