For a brighter, whiter, healthier looking smile Professional take-home whitening treatment

The most dramatic results for a healthy, whiter smile by night. Philips Zoom NiteWhite offers the convenience of a noticeably whiter smile while patients sleep.

Professional-quality results

- A custom whitening experience designed for your patients
- Are your patients experiencing sensitivity?

Highlights

Formula designed for patients

Philips Zoom NiteWhite offer a variety of custom professional whitening options designed specifically to fit your patients' whitening needs. From first-time whitening to touch-ups, Zoom provides your patient with a unique selection of formulations that are sure to help them get the smile they always wanted. Customized for your patients and applied in the comfort of their own home, Zoom NiteWhite are the only custom take-home options that help protect enamel,

provide your patients with advanced sensitivity relief, as well as improved luster and shine for the best possible whitening experience.

Experiencing sensitivity?

For ongoing take-home sensitivity treatment, replace your patients' existing toothpaste with a toothpaste containing 5% potassium nitrate and use twice daily. If additional sensitivity relief is needed, use Relief ACP before each whitening treatment.
