# Highlights

## Sonic technology

Drives fluid between the teeth and along the gumline for a powerful yet gentle clean.

## AdaptiveClean brush head

Soft, flexible sides made of rubber allow the bristles to conform to the unique shape of patients' teeth and gums to provide up to 4x more surface contact\*. The brush head's flexibility helps the bristles gently track along the gumline and absorb excessive brushing pressure. Enhanced sweeping motion delivers a unique in-mouth feel and superior cleaning along the gumline and in hard-to-reach areas\*. Proven to remove 10x more plaque than a manual toothbrush in hard-to-reach areas\*.

## Intuitive pressure sensor

If too much pressure is applied, the handle gently pulsates to tell patients they are brushing too hard to guide proper technique. In a study of U.S. patients, 7 out of 10 aggressive brushers tested reduced their brushing pressure when using the pressure sensor.

## Custom brushing experiences

Three intensity settings and three cleaning modes provide optimal comfort and performance for a more personalized brushing experience, encouraging better compliance. The three-minute Deep Clean mode delivers an exceptional clean in hard-to-reach places. It's the perfect mode for patients who need to pay extra attention to trouble spots.

## UV sanitizer

Kills up to 99% of bacteria and viruses\*. Can be available as an accessory in one of the dispensing SKUs.

## Quadpacer

Thirty-second interval timer encourages thorough brushing of each quadrant of the mouth.

## Smarttimer

Two-minute timer helps ensure dental professional recommended brushing time.
