

Philips Avent electric breast pump

Enter a new era of expressing with a perfect balance of suction & nipple stimulation inspired by the natural way babies drink. The Philips Avent electric breast pump keeps milk flow at an optimum & gently adapts to your nipple size & shape

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Energy

- Annual energy consumption 1,0-2,7 kWh/year*
- Standby power: 0,09 W (non-battery version) 0,41 W (battery version)
