Highlights

Less colic

Our anti-colic valve is designed to keep air away from your baby's tummy to reduce colic and discomfort. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce colic and discomfort.

Less fussing

Philips Avent Anti-colic bottle reduces fussing. Babies fed with Philips Avent Anti-colic bottles experienced 60% less fussing at night, than babies fed with a competitor's anti-colic bottle.*

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Leak-free design

Our Anti-colic bottle is designed to prevent leakage whilst feeding, for a truly enjoyable feeding experience.

Easy to assemble and clean

With only 4 parts, a wide bottle neck, and rounded corners, our bottle is easy to quickly assemble and clean thoroughly. Have peace of mind that your bottle is truly clean in no time.

Easy to hold

The unique bottle shape makes this bottle easy to hold and grip in any direction.

First step to a drinking cup

With the trainer cup, your baby will be able to hold the bottle independently while drinking from the familiar teat.

Orthodontic Soother

Flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends up upside-down in the mouth.

BPA free*

The Philips Avent Classic+ feeding bottle is made of BPA free* material (polypropylene).
