- Easy to clean and assemble with few parts
- Easy to hold
- Wide neck bottle with rounded corner for easy cleaning

Other benefits

- Orthodontic, symmetrical and collapsible soother teat
- Different teat flow rates available
- Compatible with Philips Avent range
- Trusted by moms since 1984

Highlights

Less colic

Our anti-colic valve is designed to keep air away from your baby's tummy to reduce colic and discomfort. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce colic and discomfort.

Less fussing

Philips Avent Anti-colic bottle reduces fussing. Babies fed with Philips Avent Anti-colic bottles experienced 60% less fussing at night, than babies fed with a competitor's anti-colic bottle.*

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Secure latch

Teat shape designed for secure latch

Leak-free design

Our Anti-colic bottle is designed to prevent leakage whilst feeding, for a truly enjoyable feeding experience.

Easy to assemble

Our Anti-colic bottle has few parts for quick and simple assembly.

Easy to hold

The unique bottle shape makes this bottle easy to hold and grip in any direction.

Easy to clean

With its wide neck and fewer parts, our bottle is easier to assemble and to clean quickly and thoroughly.

Orthodontic Soother

Flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends up upside-down in the mouth.

Fits your baby's growing needs

The Philips Avent Anti-colic bottle range offers different teat flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. All teats are available in twin packs: Newborn, Slow, Medium, Fast and Variable Flow, and Thick feed.

Trusted by moms

Since 1984, Philips Avent has been designing and manufacturing products that are inspired by nature and have been developed through extensive research and clinical trials.

What is included

Baby bottle: 2 pcs

Soother: 2 pcs

* 0% BPA, following EU regulation 10/2011

* At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic, and significantly less fussing at night compared to babies fed with another competitor bottle.

* Teat design proven to prevent teat collapse and associated air ingestion and feeding interruptions.

* What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying and fussing.
