### Safety

- Security ring handle

### Odourless and taste-free

- User-friendly silicone teats

PHILIPS  
AVENT

# Highlights

## Orthodontic teat

Philips Avent flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends up upside down in the mouth.

## User-friendly silicone teats

The Philips Avent silicone teat is taste-free and odour-free so it's more likely to be accepted by your baby. The silicone is smooth, transparent, easy to clean, and it doesn't get sticky. The teat is strong, long-lasting, and won't become misshapen or discoloured over time.

## Snap-on protective cap

To keep sterilised teats hygienic

## Security ring handle

For easy removal of the Philips Avent soother at any time

## Acceptance proven

9 out of 10 babies accept the Philips Avent soother (tested online with 100 mums, UK 2012).
