

PHILIPS

Analogue baby
monitor

SCD469/05

Automatically rings your phone

Functions as a normal baby monitor. However, there are occasions when you need that extra freedom a normal monitor is unable to provide; for example, when you are gardening. With the Dial-Up monitor you can easily switch to the dial-up mode

Convenience for you and your child

- Allows you to talk to the baby
- See baby's sounds even with the volume off

Complete peace of mind

- Indicates a continuous connection between the two units
- For reduced interference
- Pick up the phone and listen to your child
- For total flexibility
- Extend the reception range for virtually unlimited distance

Ultimate mobility in and around the house

- When used as a normal baby monitor, in open air
- Rechargeable parent unit for minimum 24 hours of monitoring

Highlights

Automatically calls your phone when baby cries

Pick up the phone and listen to your child

Unbeatable listening range via phone network

Extend the reception range for virtually unlimited distance

Digital signal confirmation

Indicates a continuous connection between the baby and the parent unit with visible and audible link indicators.

Works with landlines and mobile phones

For total flexibility.

4 channels

For reduced interference.

Operating range of up to 200 m

When used as a normal baby monitor, in open air

Rechargeable parent unit

The rechargeable parent unit gives you a minimum of 24 hours of cordless monitoring with a range of up to 300 m (900 feet).

Sound-level lights on parent unit

Sometimes it's a great help to 'see' when your baby makes a sound. This row of lights provides you with a clear visual indication.

Parent talkback

Allows you to hear the baby and talk to the baby.
