## A healthy climate for your baby

Helps sustain a comfortable humidity level

The humidity level of an environment plays a vital role in overall wellbeing. To give your baby's immune system the best start, it will help to monitor the humidity level of his/her immediate environment.

### **Convenience for you and your baby**

- No condensation due to ultrasonic vaporation principle
- Adjustable mist output
- Your baby can sleep peacefully due to silent operation

### **Baby's safety**

- Completely safe, cool mist output
- .

### **Reassurance on your baby's wellbeing**

- Helps maintain baby-soft skin
- Monitor the ideal humidity and temperature
- Prevents mucous membrane irritation

# Highlights

## Prevents mucous membrane irritation

By creating a comfortable humidity level, the ultrasonic humidifier helps protect your baby against sore throats and irritation to the mucous membrane. This has a positive effect on building up resistance to infection.

## Helps maintain baby-soft skin

Adding moisture to the air helps to keep your baby's delicate skin healthy and soft.

## Hygrometer and thermometer handset

A hygrometer and thermometer handset is included to allow you to monitor and maintain the ideal humidity and temperature levels in your baby's room. (Ideally, between 16 and 20°C with a relative humidity of 40 to 60%).

## Adjustable mist output

Simply set the mist output to suit day-to-day conditions and your baby's needs.

## No condensation

A safe and natural system for your home – The cool, healthy mist created by high-frequency ultrasonic waves does not cause condensation or increase room temperature.

## Completely safe, cool mist output

A safe and natural system for your home – The cool, healthy mist created by high-frequency ultrasonic waves does not cause condensation or increase room temperature and is totally safe for your baby.

## Operates silently

Thanks to the silent operation of the humidifier, your baby can sleep peacefully.

## Automatic stop

# Specifications

## Weight and dimensions

**Product weight:** 3.3 kg

## Development stages

**Stage:** 0–6 months, 6–12 months

## Power

**Mains power:** AC 220 – 240 V

**Power consumption:** 35 W

**Frequency:** 50/60 Hz

## Weight and dimensions

**Product dimensions (W x D x H):** Ø 240 x 330 mm

## Technical specifications

**Noise level:** < 35 dB

## Technical specifications

**Temperature measurement range:** -10–40 °C

**Relative humidity range:** 20% – 80% RH

**Evaporation output:** 250 ml/h

**Evaporation technology:** Ultrasonic

**Water tank volume:** 2 l
