

Philips
Ultrasonic Humidifier

SCH580

A healthy climate for your baby

Helps sustain temperature and humidity level

By creating a comfortable humidity level, the ultrasonic humidifier will help protect your baby against sore throats and irritation to the mucous membrane. This has a positive effect on building up resistance to infection.

Convenience for you and your baby

- No condensation due to ultrasonic vaporation principle
- Adjustable mist output
- Your baby can sleep peacefully due to silent operation

Baby's safety

- Completely safe, cool mist output
- Automatic switch off for the safety of your baby

Reassurance on your baby's wellbeing

- Helps maintain baby-soft skin
- Monitor the ideal humidity and temperature
- Prevents mucous membrane irritation

- Power consumption: 35 W

Highlights

Prevents mucous membrane irritation

By creating a comfortable humidity level, the ultrasonic humidifier helps protect your baby against sore throats and irritation to the mucous membrane. This has a positive effect on building up resistance to infection.

Helps maintain baby-soft skin

Adding moisture to the air helps to keep your baby's delicate skin healthy and soft.

Hygrometer and thermometer handset

A hygrometer and thermometer handset is included to allow you to monitor and maintain the ideal humidity and temperature levels in your baby's room. (Ideally, between 16 and 20°C with a relative humidity of 40 to 60%).

Adjustable mist output

Simply set the mist output to suit day-to-day conditions and your baby's needs.

Operates silently

Thanks to the silent operation of the humidifier, your baby can sleep peacefully.

No condensation

A safe and natural system for your home - The cool, healthy mist created by high-frequency ultrasonic waves does not cause condensation or increase room temperature.

Automatically switches off

When the water tank is empty, the appliance automatically switches off.

Completely safe, cool mist output

A safe and natural system for your home - The cool, healthy mist created by high-frequency ultrasonic waves does not cause condensation or increase room temperature and is totally safe for your baby.
