- Natural steam sterilisation kills 99.9% of harmful germs

PHILIPS
AVENT

Highlights

Convenient for travel

The Philips Avent Microwave Steriliser has been designed to fit most microwaves on the market. Its small size makes it convenient for travel, ensuring that you always have a sterile bottle when you are going on a short overnight trip or on a longer holiday abroad. Also ideal as an extra steriliser for at the grandparents' house. Dimensions: 166 (H), 280 (W), 280 (L) mm.

Clips close the lid securely

The microwave steriliser has clips on the side for extra safety. The clips close the lid securely so hot water cannot easily escape when you take the steriliser out of the microwave. The side grips have also been designed to stay cooler to help you handle the steriliser safely.

Contents remain sterile

Contents remain sterile for up to 24 hours if unopened

Holds 6 Philips Avent bottles

Despite its small size, it is the only microwave steriliser that is designed to fit 6 Philips Avent bottles. Whereas most microwave sterilisers will only fit 4 bottles, the Philips Avent Microwave Steriliser allows you to sterilise a full day's worth of bottles in one go. It is also suitable for sterilising breast pumps.

Natural steam sterilisation

Sterilising is all about protecting your baby from particularly harmful milk bacteria until his immune system is strong enough. The Philips Avent Steriliser uses the hospital method of steam sterilisation, which is quick, easy and efficient, with no chemicals involved.

Kills 99.9% of harmful germs

Sterilising protects your baby from particularly harmful bacteria until his immune system is strong enough. Operating at a higher temperature than dishwashers, Philips Avent Sterilisers kill 99.9% of harmful germs and contents stay sterile for 24 hours if the lid is unopened.
