AVENT

Highlights

Guaranteed zero interference

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and mobile phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby

Reassuring crystal clear sound

Hear every tiny giggle, gurgle and hiccup with perfect clarity. DECT technology provides high quality, crystal clear sound so you can hear your baby anytime

Superior operating time

The small, rechargeable parent unit will give you the freedom of cordless roaming for up to 24 hours before re-charging is required

Humidity and temperature sensor

Combined humidity and temperature sensor allows you to monitor the climate in baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature, and too much or too little humidity can make your baby restless. A specially combined humidity and temperature sensor will immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes. Monitor the complete climate in baby's room

LEDs light to signal noise

Lights are activated to indicate the level of sound in your baby's room. Even with the Parent Unit is muted, a vibrating sound alert

will notify you when a set sound level is reached

Extended operating range

With a range of 330 m, a belt clip and neck cord so you can be fully mobile in and around the home. A versatile travel bag will protect your baby monitor when you are away from home

Adjustable sound sensitivity

Enables you to adjust the sound and volume levels, so you can hear every giggle, gurgle and hiccup

Out of range/low power signals

The parent unit of the Philips Avent baby monitor will alert you when the power is low or if you are out of range
