PHILIPS
AVENT

Highlights

Holds up to 6 bottles

The steriliser has a smart design that takes up little space in your kitchen, yet still fits six Philips Avent Bottles or two Philips Avent Breast Pumps. The two baskets inside can clip together to form a dishwasher basket, which makes pre-cleaning of smaller items like soothers and teats much easier.

Sterile contents for 6 hours

Once the sterilisation cycle has been completed, the contents inside the Philips Avent Electric Steriliser will remain sterile for up to 6 hours if the lid is unopened.

Contents sterile in 8 minutes

With the Philips Avent Electric Steriliser you can sterilise contents in as little as 8 minutes

Just add water

The Philips Avent Electric Steriliser is very easy to use. Just add water, load the steriliser with the contents you would like to sterilise and switch it on.

Natural steam sterilisation

Sterilising is all about protecting your baby from particularly harmful milk bacteria until his immune system is strong enough. The Philips Avent Steriliser uses the hospital method of steam sterilisation, which is quick, easy and efficient, with no chemicals involved.
