Fresh and healthy

Preparing healthy food for your baby is vital and starts with sterilising bottles and teats and ensuring the food temperature is just right.

Quick and easy food preparation

- Defrosts frozen baby food
- Quickly heats up bottles and jars to perfect temperature
- Steams all types of fruit and vegetables
- Fits all bottle and jar types

Baby's food never too hot

- The baby's food never gets too hot
- Temperature control system
- Graduated temperature control

Fast and reliable sterilising

- Sterilises up to 6 standard bottles and 4 wide-neck bottles
- No chemicals needed
- Kills all household bacteria in minutes using tap water
- Suitable for sterilising small plastic toys

Healthy baby food

Highlights

Temperature control system

The latest heating technology incorporates a PTC heating element, and two sensors ensure that the water in the beaker quickly reaches the ideal temperature and maintain it at a safe level that won't burn your baby's mouth with food or milk that is too hot.

Overheat protection

To avoid the danger of accidentally burning your baby's mouth, the automatic switch-off ensures that the food does not get too hot.

PTC heating element

To avoid the danger of accidentally burning your baby's mouth, the automatic switch-off ensures that the food does not get too hot.

Disinfects completely

Protect your newborn baby from any harmful household bacteria or germs by disinfecting her bottles, teats, soothers and small plastic toys.

Holds 4-6 bottles

Convenient use of the steriliser means having the disinfected bottles ready when you need them. This means fitting all bottles needed for a day's feeding into the steriliser in one go.

No chemicals needed

Chemical residues in baby's food are a nightmare to think about. Therefore, items are sterilised using very hot steam.

Sterilises small plastic toys

By disinfecting small plastic toys, you can protect your newborn baby from any harmful household bacteria or germs while she discovers and plays with her toys.

Preserves all vitamins

When preparing baby's food, keeping all vitamins is very important for your baby's healthy growth. Steaming vegetables or fruit is the optimum way of making sure these healthy vitamins are perfectly maintained.

Defrosting baby food

Conveniently defrost any baby food that you prepared in advance and put in the freezer. This means you can have healthy baby food ready whenever your baby needs it.

Perfect temperature in 5 minutes

This bottle warmer reliably heats bottles and jars to exactly the right temperature within three minutes to make sure your hungry baby doesn't need to wait long for her food. And no worries about burning baby's mouth either, thanks to the innovative heating technology.

Steams all veggies

Once your baby starts eating solid foods, you can prepare healthy steamed vegetables and fruits while preserving the vitamins and nutritional goodness.

Fits all bottle and jar types

The product is designed in such a way that bottles and jars of all kinds of sizes and shapes fit in.

Specifications

Power

Power supply: 220-240 V
