Accurate temperature

The baby thermometer floats in water

The Philips Avent Digital Bath and Bedroom Thermometer doubles as a convenient way to monitor the temperature both in your baby's room and bath. It has also been designed and tested as a safe, fun bath toy.

Fast and reliable measurement

- Accurate temperature readings for bath or bedroom

Safe to play with

- Complies with all relevant toy and safety standards
- Floats in water
- Safe and fun

Highlights

Accurate temperature readings for bath or bedroom

The digital bath and room thermometer allows you to conveniently determine the ideal temperature of your baby's bath or room. Your baby will feel most comfortable in bath if the water is between 36.5°C and 38°C. A temperature of 39°C and above is too hot and your baby could get burnt! At a room temperature of about 18°C babies feel most comfortable when sleeping.

Complies with all relevant toy and safety standards

The products that comply with the toy standard have been thoroughly tested to ensure they meet these norms and are totally safe.

Floats in water

Floats in water

Safe and fun

Designed as a safe and fun toy for babies of any age to play with when bathing.
