Efficia

DFM100
defibrillator/monitor

**At the heart of your
code response**

Tried and trusted

When every second counts, keep it simple

A patient goes into cardiac arrest, and you need to act fast. The Philips Efficia DFM100 is at the core of your response. Designed for simplicity, it has all the essential features you need in a defibrillator and monitor. This ultra-reliable crash cart device adapts to critical care guidelines and every clinical environment - from the operating room to outpatient departments.

- ALS manual defibrillation
- Synchronised cardioversion
- Pacing
- AED Mode
- 3/5-lead electrocardiogram (ECG)
- Non-invasive blood pressure measurements (NBP)
- Oxygen saturation (SpO₂)
- EtCO₂ - Mainstream and Sidestream

Designed to save more lives

The Efficia DFM100 is suitable for a wide range of patients, as well as basic and advanced care teams. From monitoring an adult with chest pains to responding to a cardiac arrest, you only need one solution for defibrillation, monitoring, synchronised cardioversion, pacing, or EtCO₂.

Time-saving simplicity

The Efficia DFM100 is also designed to be easy to use with configurable features normally reserved for more advanced solutions. When the ready for use (RFU) indicator is flashing, you can see at a glance that it's ready to respond. With a large clear screen navigating menus and optional voice prompts helps support a fast and efficient response. The DFM100 will shock within 5 seconds after the end of CPR, keeping the CPR pause to a minimum.

Seamless handovers

Handovers are just as swift because the Efficia DFM100 uses the same cables and ports for clinical measurements as other Philips patient monitors. It also features the same interface across hospital and EMS versions to help minimise the time and cost of staff training. And you'll only need one type of multi-function pads, and one set of paddles for all responses, which means less equipment to store, manage and maintain in every department.

Data capture and documentation

The Efficia DFM100 also collects and trends data for up to 8 hours of continuous monitoring that you can export to Event Review Pro. That means you can review every aspect of your code response, from data capture to post event documentation.

Helps to save valuable costs

When it comes to daily operations, the Efficia DFM100 is also a budget-friendly solution that can help minimise the time and cost of staff training. Add to that a multi-year warranty to help control service costs and you have a solution that can help minimise your cost of ownership over a reliable lifetime.

This crash cart device adapts to every clinical environment."

Easy as 1-2-3

1 Select Energy

2 Push Charge

3 Press Shock

Simply all you need in an emergency

With field-proven Philips technology, core functionality and a scalable feature set, the Efficia DFM100 is equipped to meet the demand of patient care in every hospital department.

The Efficia DFM100

- Interface and large clear screen designed to be simple and easy to use
- Developed to be intuitive Philips defibrillation controls and clear voice prompts
- AED mode/manual mode
- 1-2-3 process requires minimal training

- Active flashing RFU indicator
- Automated self-tests helps save time checking devices and helps ensure product is ready to respond
- SMART biphasic therapy delivers a fast, reliable shock at 150J within five seconds in manual mode

- Designed to be easy to maintain
- Pads can be shared between Philips AEDs and DFM100
- A universal user interface across EMS and hospital versions may minimise the time and cost of staff training
- Compatible low-priced patient monitoring consumables

Event Review Pro

Efficia DFM100 teams up with Event Review Pro software to create a comprehensive solution with compelling insights across the care continuum.

- Analyze and fine tune your facility's response to cardiac events
- Measure and annotate waveforms
- Create a wide range of reports including pre- and post-shock reporting
- Flexible workflows that fit your needs
- View and evaluate trends to enhance patient outcomes

The Efficia DFM100 can help you deliver care at an affordable price with the quality and reliability proven in more than 2.5 million Philips' AEDs that use the same defibrillation technology and waveform. Philips Efficia DFM100. Simply, all you need.
