Highlights

Car adapter

A bottle warmer with car adapter that can heat baby's food in the car. This way you can maintain the feeding cycle and routine of your baby even while traveling.

Temperature control system

The latest heating technology incorporates a PTC heating element and two sensors ensures the water in the beaker quickly reaches the ideal temperature and maintains it at a safe level that won't burn your baby's mouth with food or milk that is too hot.

Overheat protection

To avoid the danger of accidentally burning your baby's mouth, the automatic switch off ensures the food does not get too hot.

PTC heating element

To avoid the danger of accidentally burning your baby's mouth, the automatic switch off ensures the food does not get too hot.

Double insulation

With your safety and convenience in mind, the double insulated bottle warmer is designed to be used in every room in the house, not just where a earthed mains socket is available. There are no exposed metal parts that can become live.

Bottle and jar lifter

Even short bottles and jars are easily removed from the bottle warmer thanks to the handy lifting handle.

Click-step temperature setting

With the Click-step temperature setting you can adjust the setting to suit the different types of food and bottles and jars you want to heat up.

Fits all bottle and jar types

The product is designed in such a way that all kind of sizes and shapes of bottles and jars fit in.
