## AVENT

Anti-colic teat

2 pcs

Newborn-flow teat

0m+

SCF631/27

## Clinically proven to reduce colic and discomfort\*

Our Anti-colic teat is designed for uninterrupted feeding. Air is vented into the bottle and away from the baby's tummy. The ribbed texture prevents teat collapse and reduces feeding interruptions and discomfort.

### Other benefits

- Different teat flow rates available
- This teat is BPA free

### Clinically proven to reduce colic and discomfort\*

- Anti-colic valve proven to reduce colic\*
- 60% less fussing at night\*
- Teat shape designed for secure latch
- Ribbed texture prevents collapse for uninterrupted feeding

# Highlights

## Less colic

Our anti-colic valve is designed to keep air away from your baby's tummy to reduce colic and discomfort. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce colic and discomfort.

## Helps settle your baby

Philips Avent Anti-colic bottle reduces fussing. Babies fed with Philips Avent Anti-colic bottles experienced 60% less fussing at night than babies fed with a competitor's anti-colic bottle.\*

## Uninterrupted feeding

The teat shape allows a secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

## Secure latch

Teat shape designed for secure latch

## Fits your baby's growing needs

The Philips Avent Anti-colic bottle range offers different teat flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. All teats are available in twin packs: Newborn, Slow, Medium, Fast and Variable Flow, and Thick feed.

## BPA free

Philips Avent Anti-colic teat is made of BPA free material (silicone).

# Specifications

## Development stages

## What is included

Teat: 2 pcs

## Teat

Flow speed: Newborn flow

\* At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic and significantly less fussing at night compared to babies fed with another competitor bottle.

\* Teat design proven to prevent teat collapse and associated air ingestion and feeding interruptions.

\* What is colic and how does it affect babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying and fussing.

\* 0% BPA, following EU regulation 10/2011
