# Highlights

## Relaxing position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle, even when you are sitting up straight. This means you can sit more comfortably when pumping: no need for you to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping, helps your milk to flow more easily.

## Soft massage cushion

Our massage cushion has a soft velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk flow. The iconic petal cushion is designed to mimic baby suckling, intended to gently help stimulate let down.

## Easy on-the-go

The breast pump is small and lightweight, which means it is easy to store and transport, making pumping on-the-go more discreet.

## Easy set up, express and clean

Few separate parts and intuitive design. Easily express milk for your baby, anytime.

## Includes our Natural bottle

The wide breast shaped nipple promotes natural latch on similar to the breast, making it easy for your baby to combine breast and bottle feeding.
