

PHILIPS

Automated External
Defibrillator

HeartStart Home

Philips HeartStart Home

Philips HeartStart Home AED is made for people who have never used a defibrillator before, and it's the only defibrillator available without a prescription.

- With more than two million AEDs sold, Philips is the trusted worldwide leader in emergency care resuscitation.¹
- Philips AEDs are one of the most comprehensive daily self-testing devices available.
- Philips AEDs offer expert, adaptive guidance to enable proper use for every situation.

Easy access to lifesaving support should always be close at hand

Ready to act when you're ready to go

Designed for the ordinary person in the extraordinary moment, Philips HeartStart Home is ready to act when you're ready to go. It allows users to treat the most common cause of sudden cardiac arrest, wherever it happens.

Treat with confidence

With access to the right equipment and support, you can help save a life. The Philips HeartStart Home AED guides you through the process of treating a suspected victim of sudden cardiac arrest. Using clear, calm voice instructions, it guides you through each step of a rescue, including defibrillation and CPR guidance.

Easy as 1-2-3

We've equipped the Philips HeartStart Home AED with integrated SMART Pads that provide feedback to the AEDs so it can adapt voice instructions to your actions and your pace. The system won't announce the next step until you are ready. Prompts are repeated and rephrased and include additional instruction to aid understanding.

Available without a prescription

Philips HeartStart Home is the first and only AED available without a prescription, enabling easy access to lifesaving support that can help you protect the ones you love.
