- Clinically proven to significantly reduce fussing

To fit your baby's growing needs

- Five different teat flow rates are available

PHILIPS

Highlights

0% BPA

This product contains 0% BPA

Unique anti-colic system

As your baby feeds, the unique valve on the teat flexes to allow air into the bottle instead of your baby's tummy.*

Easy latch on

Unique valve on the teat flexes to your baby's feeding rhythm. Milk will only flow at the pace chosen by

your baby to minimise overeating and spit-up, burping and gas

Helps settle your baby

Sleep and nutrition are vital to your baby's health and happiness. A randomised clinical trial was carried out to see whether infant baby bottle design affects "infant behaviour". The Philips Avent Classic baby bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs. 74 min, $p=0.05$). This was especially true at night.**

Fits your baby's growing needs

Five different teat flow rates are available.

Specifications

Development stages

- Stage: 6 months +

Bottle

- Material: BPA free

Material

- BPA-free*
