The natural way to bottle feed

With the Philips Avent Natural variable flow teat, you can adjust the flow rate by simply turning the bottle. The teat features an innovative petal design for natural latch-on similar to the breast, for easy combining of breast and bottle.

BPA Free (0% Bisphenol A)

- BPA-free teat

Easy to combine breast and bottle feeding

- Natural latch on due to the wide breast-shaped teat

A more comfortable and contented feed for baby

- Unique Petals for a soft, flexible teat without collapse

Vents air away from your baby's tummy

- Advanced anti-colic system with innovative twin valve

Other benefits

- Different flow rates for the most comfortable feed
- Compatible with Philips Avent Natural feeding bottle

Highlights

Natural latch on

The wide, breast-shaped teat promotes natural latch-on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Unique comfort petals

Petals inside the teat increase softness and flexibility without teat collapse. Your baby will enjoy a more comfortable and contented feed.

Advanced anti-colic valve

Innovative twin valve designed to reduce colic and discomfort by venting air into the bottle and not baby's tummy.

BPA free

This teat is made from silicone - a BPA-free material (Following EU directive 2011/8/EU)

Different flow rates

Philips Avent offers four different flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. Philips Avent offers the newborn flow teat with 1 hole (0M+), the slow flow teat with 2 holes (1M+), the medium flow teat with 3 holes (3M+) and the fast flow teat with 4 holes (6M+). All teats are available in twin packs.

Compatible with Natural bottle

We advise using the Natural feeding teats with Natural bottles only.

Adjust the flow rate

With the variable flow teat, you can adjust the flow rate according to the liquid's thickness and suit baby's feeding rhythm perfectly. We recommend that you use this teat for thicker liquids such as AR (thickened) milk, milk mixed with baby rice, milk mixed with baby food, soup... Once baby is ready for an even faster flow, we recommend that you use the Philips Avent Thick Feed teat.
