- Do not use the appliance if the plug, the mains cord or the appliance itself is damaged.
- If the mains cord is damaged, you must have it replaced by Philips, a service centre authorised by Philips or similarly qualified persons in order to avoid a hazard.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Keep the appliance and its cord out of the reach of children.
- Do not point the hose, the tube or any other accessory at the eyes or ears nor put it in your mouth.

Troubleshooting

1 The suction power is insufficient.

- A The dust container may be full. Empty the dust container.
- B The filters may be dirty. Clean or replace the filters.
- C The suction power may be set to a low setting. Increase the suction power with the regulator on the appliance or on the handgrip.
- D The nozzle, tube or hose may be blocked up. To remove the obstruction, disconnect the blocked-up item and connect it (as far as possible) the other way around. Switch on the vacuum cleaner to force the air through the blocked-up item in opposite direction.

2 When I use my vacuum cleaner I sometimes feel electric shocks.

- A Your vacuum cleaner builds up static electricity. The lower the air humidity, the more static electricity the appliance builds up. Discharge the appliance by frequently holding the tube against other metal objects in the room (for example the legs of a table or chair; a radiator etc.). You can also raise the air humidity level in the room (for example by placing bowls filled with water on or near radiators).

故障种类和处理方法

1 吸力不足。

- A 集尘桶可能已满。清空集尘桶。
- B 过滤网可能脏了。清洁或更换过滤网。
- C 吸力可能被设置在较低的档位。使用调节器增强产品或手柄的吸力。
- D 吸嘴、硬管或软管可能被阻塞。要清除阻塞物，请将阻塞的部分拆下，并将它反向连接（尽可能离远一些）。打开吸尘器的电源，强迫气流反方向通过阻塞的部位。

2 有时，在使用吸尘器时会有触电的感觉。

- A 您的真空吸尘器会积聚静电。空气湿度越低，产品积聚的静电就越多。经常握住硬管使其与房间中的其它金属物体接触（例如桌椅脚或电炉等）对产品进行放电。您也可以增加房间的空气湿度（例如将装有水的碗放在电炉上或附近）。
