Highlights

Stainless steel thermal jug

This premium, unbreakable stainless steel thermal jug maintains the full aroma and temperature for more than 2 hours. Thanks to its double-wall design, the coffee is at least 65°C after 2 hours.

Smart lock on thermal jug

The thermal jug is equipped with a smart lock that can easily be operated. The lock ensures the aroma and temperature is fully preserved when the jug is taken out of the coffee maker.

Rich coffee flavor

Thanks to the concentrated water flow that is poured onto the coffee bed, optimal flavors are extracted from the coffee grounds.

Drip stop

The drip stop allows you to pour a cup of coffee before the full brewing cycle is finished.

Cable storage compartment

Spare cable can be stored very easily in the cable compartment in the back of the coffee maker. It enables placing the coffee maker nicely in your kitchen.

Direct automatic shut-off

Auto-off

After brewing your coffee, the coffeemaker switches off automatically for energy saving and safety. The thermal jug will ensure that the coffee stays hot.

Water level indication

Fill the water tank easily and precisely with the water level indication.
