- Minimal parts and intuitive setup
- Quiet motor for a discreet experience anywhere (corded use)
- Pause/Play function
- Personalized experience, 8 + 16 setting levels
- Memory function

#### Gentle and comfortable

- One size soft and adaptive silicone cushion
- Express without leaning forward

#### Quick expressing, more milk in less time\*

- Natural motion technology for a quick milk flow\*

# Highlights

## Quick milk flow\*

Express more milk in less time\* with a cushion that stimulates the breast to express milk just like baby. It seamlessly adjusts from stimulation mode to expression mode<sup>1</sup>, and applies just the right amount of nipple stimulation and suction for maximum milk flow. Based on milk flow initiation time (time to Milk Ejection Reflex - MER) results.\*

## Adapts to your nipple

One size fits all. Because we all come in different shapes and sizes, the silicone cushion gently flexes and adapts to fit your nipple. It fits 99.98% of nipple sizes\* (up to 30mm).

## Sit comfortably

Feel relaxed as you express thanks to a design that lets you sit upright rather than having to lean forward. No need to lean forward, clinically proven comfortable expressing position\*. Based on product clinical trial results with 20 participants (2019); 90% of participants find the expressing position comfortable (single

electric); 95% of participants find the expressing position comfortable double electric).

## Personalize to your needs

Finely tune every session to your needs with a wide range of stimulation and expression settings. Our breast pump offers 8 stimulation and 16 expression levels for a personalized experience.

## Clean and setup easily

Our closed expression system means milk stays out of tubing so there's less to clean. Fewer parts also make it a breeze to put back together again.

## Save your favourite settings

Know what you like? The breast pump automatically remembers your last settings, so all you need to do is sit down and press start.

## Breast pump bag and pouch

Use the tailor-made bag and insulation pouch to take your pump with you and minimise bulk.

## Express anywhere discreetly

Express whenever and wherever you like thanks to our quiet motor with a slimline design. Corded use only.

## Pause whenever you like

If you need to adjust or take a break, the start/pause button is always at your finger tips.

# Specifications

## Power

Mains voltage: 100 - 240 V

## Material

Bottle: BPA free\*, Polypropylene

Teat: BPA free\*, Silicone

Breast pump: BPA-free\* (food contact parts only)
