## Smart one-touch home cooking

With ChefConnect app and WiFi connection

Feel free to do other things while delicious food is cooking. Our WiFi connected Multicooker does it all in one pot – for everything from browning, sautéing, baking and steaming to succulent slow cooking and yoghurt making.

### **ChefConnect app and WiFi connection**

- Delicious step-by-step recipes
- Detailed nutritional information, manuals and support
- Cooking status, alert for next steps and time to serve

### **Five-liter, dishwasher-safe pot**

- Ideal for families and dinner parties
- Non-stick, durable ProKeram ceramic coated surface
- With insulated handles and removable lid

### **Pre-programmed and personalized cooking cycles**

- Choose from 21 different pre-programmed dishes and meals
- Create your own programs with MyRecipe

### **Slow cooking up to 9 hours**

- Gently cooks stews, jams and other dishes
- Low and even heat for making fresh yoghurt
- Preset up to 24 hours in advance, keep warm up to 12 hours

# Highlights

## Start cooking while you're out

Preset the 'delay start' timer up to 24 hours in advance, so your food starts cooking while you're away, and is ready when you're home again.

## ChefConnect smart cooking app

Just download the app for remote control by mobile phone, from any room in your home - with pre-programmed cooking cycles, delicious recipes with wine recommendations, nutritional information, manuals and a handy 'beep' when it's time to add ingredients or your food is ready to serve.

## Nutritional information

Keep track of the nutritional content of foods and recipes, to make healthier choices. The ChefConnect app includes detailed nutritional information for all kinds of ingredients, as well as complete recipes.

## Protective child lock

To keep children safe, or to avoid accidentally hitting the wrong button, we included a quick and easy 'child lock' function that blocks the controls.

## 6mm thick cooking pot

Our five-liter pot is designed for continuous contact with our double-coil heating element, and stays warm longer. With curved walls for

easy stirring, and durable non-stick ProKeram ceramic coating. Just use the heatproof handles to lift it out - then pop it in the dishwasher to clean.

## Easy clean removable lid

When closed, the lid seals in the heat, moisture and flavor. But we also made it removable, so you can easily stir or add ingredients - and fully immersible, for thorough cleaning.

## 21 automatic programs

Choose from 21 different pre-programmed dishes and meals

## Personalized cooking cycles

We've already programmed 21 different types of foods, so you can just push the button and start cooking anything from ragout, risotto or compotes to cake, pizza and roasts. Create

your own cooking cycles with MyRecipe, for the perfect temperature and timing of every step of your favorite recipe.

## WiFi connectivity

We use your home's WiFi network to connect the multicooker to your mobile phone, so you're free to move around the house as your food cooks - while keeping track of the cooking progress.

## Making fresh yoghurt

Low and even heat for making fresh yoghurt

## Keeps food warm

Once your WiFi connected Multicooker is finished cooking, it automatically switches to 'keep warm' - so your food stays warm and ready to serve for up to 12 hours, without drying out.

# Specifications

## Technical specifications

Capacity bowl: 5 L

Cord length: 1.2 m

Power: 860 W

Voltage: 220-240 V

## Accessories

**Included:** Measuring cup, Recipe booklet, Scoop, Spatula, Steaming tray/basket

## General specifications

**Product features:** Wi-Fi connected, Double-coil heating

## Sustainability

**Packaging:** > 90% recycled materials
