Delicious grilled food with virtually no smoke thanks to advanced infrared heat technology

Philips indoor smokeless grill is a unique appliance that allows you to enjoy tasty, evenly browned grilled food all year round. The advanced Infrared Heat technology ensures up to 80% less smoke* and minimal splattering.

Makes grilling indoors an enjoyable experience

- Advanced infrared heat technology for up to 80% less smoke
- Easy setup — start grilling within 1 minute
- Easy to clean detachable parts are also dishwasher proof
- Keep your food warm with the keep warm function

Delicious, evenly grilled food. Guaranteed.

- Constant heat of 230°C for perfect browning without burning
- Powerful infrared heat sears the meat and preserves tenderness
- All sides evenly grilled thanks to special heat reflectors
- Non-stick ALU grid provides authentic BBQ grill marks

Variety of healthy grilled food

- Lean grilling — excess fat is collected on XL grease tray

Highlights

Smokeless infrared technology

The advanced infrared technology and the special reflectors guide the heat towards the grid achieving delicious, evenly grilled food, while leaving the grease tray cool enough to minimise unpleasant smoke and grease splattering. As fat and water content differ per food type, grilling some ingredients (beef and chicken) results in hardly any smoke, while with others (pork or lamb) there can be slightly more - yet much less than with current grills.

Perfectly browned, evenly cooked

Constant heat of 230°C for perfect browning without burning

Special reflector design

When using conventional grills, there are continuous temperature fluctuations that cause the grill to overshoot your set temperature and likely char your food. With the Philips Smokeless indoor grill, there's no need to adjust the temperature. The grill quickly heats up to a constant 230°C, which is the perfect temperature for searing meat and maintains that temperature throughout the entire cooking process. With one perfect temperature you will

be able to grill different types of food all at once and achieve tasty, juicy and evenly browned results with minimal effort.

Juicy and tender grilled food

The powerful infrared heat sears the meat without burning it, while the inside remains tender and juicy.

Non-stick aluminium grid

The robust die-cast aluminium grid allows for perfectly grilled food

Easy to clean

Grills and BBQs are hard to clean. However, thanks to the non-stick grid, the appliance takes less than a minute to be cleaned. Additionally, the detachable parts are dishwasher safe. Cleaning a grill has never been so easy.

Lean Grilling

Food is not cooked into its own grease and the fat is separated into the grease tray allowing for lean grilling.

Easy setup

Simple to use, easy to install. The Philips Smokeless Indoor grill consists of two parts: a grid and grease tray, which take less than a minute to assemble. With minimal parts to set up, you will spend less time on assembly and more time on enjoying all the goodness of grilled food.

Keep your food warm

Even when you have finished grilling, you can keep your food warm by switching the grill to the keep warm setting.

Specifications

General specifications

Product features: Cord storage, Dishwasher safe, Infrared Heat Technology, Non-slip feet, On/off switch

Technical specifications

Power: 1600 W
Voltage: 230 V
