# Highlights

## OptimalTEMP technology

"Now you can iron from jeans to silk with no temperature setting required. Guaranteed not to burn any ironable fabrics. Revolutionary technology with the 1) Advanced Smart Control Processor which controls precisely the soleplate temperature. You do not need to adjust the temperature 2) Compact ProVelocity steam engine delivers more steam for faster ironing. It features a compact design for easier storage"

## Energy saving

By using the ECO mode with a reduced amount of steam, you can save energy without compromising on the ironing results. For faster ironing, switch to Turbo mode, which generates more steam.

## Safe rest

The innovative Philips OptimalTEMP technology guarantees no burns on all ironable fabrics. During ironing, there is no need to put your iron back on the base station; just leave the hot iron soleplate directly on the garments or cotton ironing board cover without

an additional resting accessory. It will not damage any of your ironable garments, or the board. This makes your ironing easier, with less wrist effort.

## Steam ready in 2 minutes

Steam is ready to use in 2 minutes and can be refilled at any time during ironing.

## Tested and approved:

This iron is tested and approved by independent textile expert institutes, such as DWI, IWTO and Woolmark, for its excellent ironing performance. The Woolmark Apparel Care programme helps consumers to identify quality laundry products that are approved by The Woolmark Company for use on wool products. Philips, with its exclusive OptimalTEMP technology, is so far the only brand to be certified with the Gold standard from Woolmark. You can be confident that Woolmark-approved apparel care products are ideal for any wool garments.

## Smart Calc cleaning system

The Smart Calc cleaning system is an integrated descaling and cleaning function that protects your steam generator iron. After around 10 hours of ironing, your steam generator iron will remind you to perform the Calc cleaning process with a sound and light notification. The iron conveniently rests on the Calc container as it collects the dirty water, so you don't have to strain to hold the iron during the process. After

all the water has been collected in the container, your steam generator iron is ready to use again.

## 1.7 l water tank

Thanks to the 1.7 L watertank capacity, you can iron up to 2 hours continuously without any refills. The large filling hole makes refilling fast. You can either fill your steam generator iron under the tap or use a jug or large bottle.

## Max 4.5 bar pump pressure

The more steam, the faster the ironing. Consistent powerful steam is generated which penetrates deep inside the garments making ironing both faster and better. Steam power can be regulated to suit your needs.

## New SteamGlide soleplate

The new SteamGlide soleplate is the best Philips soleplate. Is extremely scratch resistant, glides excellently and is easy to clean.

## Steam boost up to 170 g

The steam boost can be used for vertical steaming and tough creases.
