#### Easy handling of replaceable cartridge

- $\boldsymbol{\cdot}$  Replace cartridge when the colour has changed
- Up to 3 months' ironing
- · Suitable for IronCare water descale filter

Anti-scale cartridge GC025/00

# Highlights

#### 99% calc-free\* filtered water

99% calc free

The ion exchange resin in the cartridge removes 99%\* of scale from tap water; it provides treated water that can be used for ironing. \*Under 25 l of water treatment at 8.4 dH

#### **Consistent steam flow**

Demineralised water from IronCare will help prevent scale building up quickly in the iron, inside the soleplate and boiler. Calc particles will not block the steam holes so you will get consistent steam from your iron, making your ironing experience more pleasant.

#### Prevents calc residue

The extra-effective cartridge helps prevent scale build-up. While you are ironing, your expensive dress will not be ruined by calc residue. You will be looking good with well-ironed clothes.

#### **Ultra-fast filtration**

The specially designed cartridge allows water to pass through the cartridge quickly, so you can start ironing quickly without waiting. Place IronCare next to you so you can refill your iron at any time, without taking your iron to the sink for refilling each time.

#### **Cartridge replacement**

The colour of the cartridge will change gradually based on the amount of water treated, from top to bottom. You will notice at

the end of the cartridge's life span that the colour has changed from blue to brown. Replace your cartridge when the colour changes completely to brown to ensure the appliance continues to perform optimally.

#### Up to 3 months' ironing

3

### **Months ironing**

The lifetime of your cartridge depends on the water hardness where you live and the number of hours you spend ironing per week; 1 cartridge provides up to 3 months of ironing time.

#### Suitable for IronCare

The replacement cartridge ensures optimal performance of your IronCare water descale filter.
